

KFDF Kwik Fit Series (Fillable Boots for Continuously Monitored Sumps)

Durability

- Rigid housing construction
- For use in continuously monitored sumps
- Incorporates UL Listed Pellethane® flexible reducers
- Cavity fill ensures the fitting is protected from mechanical stresses in the backfill and ensures all leak points are sealed

Simple Installation

- Simplified installation
- Unique internal bolting design gives maximum torque and removes the potential for leaks through bolt holes

Works on any Sump

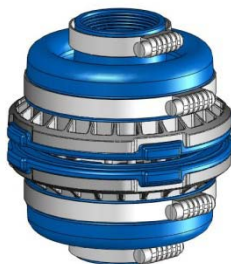

- Simplified fitting sizes and choices
- Work on flat or curved sumps

Angled Entries

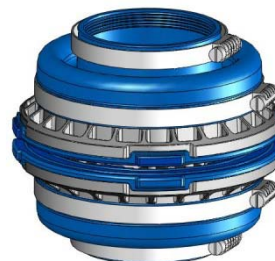

- Provides excellent flex features for angled entries, sideways AND lateral movement
- Provides maximum mechanical flange torque for total sealing pressure

Small Housing

Medium Housing
